

Protocol Requirements

- The protocol shall allow a user to view aggregated yield opportunities across multiple DeFi protocols.
- The protocol shall allow users to deposit/stake stablecoins (e.g., USDT, USDC)
- The protocol shall allow a user to withdraw their stablecoins along with earned yield at any time.
- The protocol shall allow a user to track real-time yield performance for each invested protocol.
- The protocol shall automatically allocate deposited stablecoins to the highest-yielding opportunities.
- The protocol shall periodically rebalance allocations to optimize returns.
